Gendo – Marketing

America and along with 2000 yrs. of civilization is disintegrating. If you can't see that, you're a fool. Do you really think it going to go back to familiar stable times. Many people alive today have no memory or knowledge of peaceful, stable living. You'd better wake up. The caterpillar is turning into something else...

Thinking in English was evolved in a different universe. It full of assumptions that no longer apply. Learning to think well... i.e. thinking with no preconceived unconscious assumptions... could become a matter of life and death, survival.

In a different era, I might have become a priest. The church preserved civilization thru the dark ages.

Gendo – Marginalization. Marketing

In the period between two stable systems, chaos prevails. Individuals, belonging to hitherto stable systems, become marginalized. Certain personality types, previously favored, fall out of favor... are no longer valued.

Many who had a place in the industrial would have already been discarded. ½ the world's population is below average in intelligence. They could work the assembly line at Ford and raise a family and buy a house, etc. (no more ferrymen)

Computers have made them unnecessary for production.
What are we gonna do with them?
The Managers are next!
We don't need many of us to produce our stuff. (see 9507)

9505

The age of Communalism is over.
The age of scarcity, expanding consumption is over. Our systems should encourage conservation not consumption.

We're gonna see as much change in the next 30 years as our ancestors saw in the last 200 years.

Liberation from language

liberation from a trance induced and maintained by the operation of language (American)

At the bottom of every experience...

the mystery resides.

No mere verbal formula/mapping can ~~ever~~ enter the realm of the mystery.

* Our sickness (error) is the unconscious, erroneous assumption that our verbal rantings/questions have any meaning whatsoever. The question

* Consider the visual halucination of "space". It has become real for us.
Cartesian space doesn't exist, if by "exist" we mean like a pen or spoon exists.
There is no such "thing" as "3-D space".
"3-D Space" is ORYDYSBEYS... a compression wave in a quasi-fluid medium... a word... an utterance... a puff of air.

Same goes for "~~TIME~~" TAYM.

Obviously, the whole problem boils down to the fact that "People" actually think they exist. They infected with an idea that is "wrong". Under its spell!

To admit it is scary.

Admitting it is scary.
It isn't scary.

If you think you know who you are, you're crazy. Most people, including most here in this audience, are in a trance most of the time.

That's not necessarily bad. Auto-Pilot works well for many things/dimensions/etc. Our problem is that our auto-routines are coded in English and based on assumptions (many of) hundreds and thousands of years out of date. We need to use some of our time when we're not-in-a-trance/conscious in reviewing our routines... eliminating some, modifying others, creating new ones.

It's always useful to know if you're in a trance or not.

Hint #1

If you're asking the question, "Am I in a trance?".

You're not!

In the course of my explorations of language I discovered/created a radically different and more effective method of teaching ~~American~~ as a second language.

In the vast majority of ESL classrooms around the world, people are being taught English by learning grammar.

A complete break with the past ESL methodology.

★ People don't learn to play the piano by studying books on piano construction. Once you see the truth of this it's a little mystifying why people continue the old method. Motorists think highly of their own abilities, poll finds

Motorists are quick to blow their own horns when it comes to describing their skill behind the wheel, and men have a more exalted opinion than women of their driving proficiency.

Seven in 10 motorists consider themselves better drivers than most other drivers on the road, according to a poll released Saturday. And nearly half of the drivers surveyed rated their aptitude behind the wheel as excellent.

The survey of 806 randomly selected adults found:

- 50 percent of men rated their driving ability "excellent," compared with 34 percent of women.
- 80 percent of men considered themselves "better than most" other drivers, compared with 61 percent of women.
- 36 percent reported that they usually drive above the speed limit.

The survey by the Gallup Organization for U.S. News & World Report and CNN had an error margin of 4 percentage points.

Well actually, that you believe it

You mistake the map for the territory

I has been liberated from the ~~tra~~trance/ ~~tyra~~tyranny of the LM

I know it irks the hell out of some of you that I claim to know more about you (your LM anyway) than you do about yourself. And that's exactly what I claim. "I" knows more about "you" (well, some important aspects of "you") than you does.

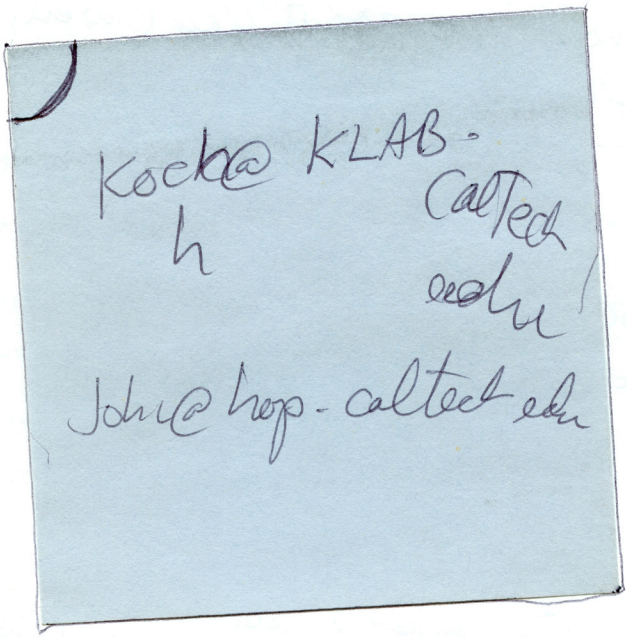

Most sapes are completely oblivious to the actual information content of an utterance They're responding to mammalian pheromones, dominance posturings, etc. They've looking for an idol to identify with. The idol should flaunt what people secretly wished they were.

Being a guru is not easy. You have to hang around sapes. You have to listen to their petty whining complaints about their puny self-centered existence.

The Heronstone Institute guarantees that you won't be seeking enlightenment after 2 years of gendo.

Do you expect to be seeking enlightenment when you're 70? When will you be willing to BE enlightened?

- Do you want always to be seeking E.?

Proposal to Jason Kim
~~In light of the~~ ~~Given the~~ problems referred to ~~stated~~ in my Response to Warning Letter, ~~May 3~~ ~~later~~ ~~propose~~

I know how to build a good team of educators that can give this school a reputation in the community of really producing students who are improved.
Student will notice and appreciate their progress. They'll tell their friends about BNS

9642

Proposal

With the people we've got right now, we could build an ESL organization that will have a reputation...

Combining my new methods for ~~speed~~ teaching speaking + hearing skills and the more traditional writing and reading and grammar lessons, we can ~~pass~~ graduate students who are ~~significantly~~ ~~super~~ and self-consciously improved.

I'll be happy to meet with you any time if you like to discuss details.

A ~~New~~ thorough restructuring of the ESL Curriculum. I know no one wants to deal with this but in my opinion, it is essential.

Mr Ericsson did a fine job in documenting what people in fact had been doing; But it didn't really address the fundamental flows of what's going on ~~h~~ now.

People don't learn to play the ~~people~~ piano by studying books about how pianos are constructed they learn by ~~play~~ practicing playing the piano. The same applies to speaking English.

Response

At the time I acted to preserve the integrity of my classroom. I see now, that I could easily have worked with Johnatha had he had the basic courtesy to inform me as to his intentions.

9644

It was a gut-level reaction to protect the integrity of ~~the~~ my classroom I say, "my" because every good teacher has a possessive attitude to his/students. J. has no ~~plan~~ her educational plan because J. knows ~~nothing~~ about ~~English or~~ teaching very little or English, for that matter.

I see now a way to bring a new student into a class at the end.

The problem is J's lack of planning ~~or~~ and communication.

Q: Does a liberated being still "have problems"?
A- Of course. But they don't have any problem with that. They just go ahead and deal with the problems.

Q- Do they worry?
Of course. But they don't worry ~~#~~ about worrying. Usually worrying is a quickly passing phenomenon

Many people want children because they feel alienated, disconnected. They believe they will feel "better" if they have children. Many actually feel even worse, more disconnected. And, of course, you can't fool your children. They will grow up to be the part of yourself that reflect fear/hate the most.

Most sapes have a lot of repressed, unconscious self-hatred. Until you become conscious of that fact and acknowledge its effect on your life.

what I would like

I'm looking to meet up with someone who not only has a passion about language and the credentials to impress those that are impressed by credentials, and a desire to create an ESL Empire.

I've developed set of structured speaking exercises.

I ~~never~~ seldom allow printed material on a students desk. The classes are

high energy, high participation. 9671

You can't speak like an American until you can hear. The primary job of accent reduction, pronunciation is ear training. Immigrants actually do not hear the same way Amer. do. They must be taught how to hear. Fortunately, this is relatively easy to do and it's fun to do it, when facilitated properly.

→ our sense of "reality" — our moment to moment experience — our explanations of our moment to moment experience — our emotional responses to our explan. of our moment to moment experience are all guided by the structure of the language running in our LM.

If you are unaware, specifically, as to the problems introduced by the LM, you are under its influence.

The very idea/assumption that there is an "I" inside that body. that directs its behavior is merely an idea cooked up by a LM.

Most sapes mistake an interesting perspective on experience with THE WAY IT IS.

ESL Introduction

My name is Dennis Horn,
I'm writing to you as a fellow ESL professional
I've developed a

I've been using this system for the past few years with a lot of success. It's time to try it on a larger scale.. to train other teachers to see if my success is actually teachable or just a fluke of my personality

If you're interested in meeting with me please call ~~me~~ and we'll arrange it.

Mr Kim

If you're not willing to do what it's gonna take to build a first-rate, stable institute, why don't you just close the school now, before you hurt even more people. As Americans say, "Shit, or get off the pot!"

Many businesses fail because the founder is unable to make the transition to a real management TEAM. In the beginning the founder does everything, makes all

the important decisions. At some point, the system get beyond the complexity that the individual can manage. Either he delegate REAL power to a well chosen mgt. team or the org dies. You need to hire competent people, and you must give them authority.

Dennis' problem is that he has a low tolerance for stupidity, even his own especially his own.

ESL

learning to speak a 2nd lang is a muscular activity. Muscle may be entrained. Just like learning/practicing the scales in music there are some "natural" pianists who never studied piano scales. But they develop highly idiosyncratic styles

It's helpful (even necessary maybe) to understand the material contained herein, if the reader is interested in being liberated in the next year or two.

However, you can know all about liberation and not be liberated

Since this preface is written in English (1995) there is a certain paradoxical nature in even talking about being liberated + who is liberated is an interesting question, but I may be obtained without an exhaustive investigation of [illegible] lib. You are referred to Alan Watts to explore this aspect of Liberation

I'd like an opportunity to come by your office and ~~give~~ show you my system/method.

Redo ESL in 8½ x 11

I've developed a specialty in teaching speaking/hearing skills.

Speaking

Mastering the speaking of a 2nd lang. as an adult, required re-programming of the muscles of the vocal speaking apparatus. Aside from the "intellectual" component of acquiring etc... there is a musicular component How does a person learn to play piano. Not by studying music theory or piano construction. He learns by practicing — that is by playing it. Not by listening to someone play... not be hearing someone explain theory of music or treatises on piano construction.

9782

I've developed a collection of graduated speaking/hearing "etudes". The start short and simple and become gradually ~~more~~ longer and more complex.
I have completed over 500 of approx. 800 ~~exercises~~ etudes.
During the speaking class, no printed material is ~~allow~~ used.

I've been teaching ESL for ~~about 6 years~~ over 5 years. But, frankly, the schools I've taught at were somewhat less than good.

I would really like to be a part of a more dedicated, rigorous academic community.

I love school — on both ends. as a student and as a teacher.

A really different approach to teaching E.

A: Because I (Heron) still have Dennis to contend with. He feels insecure and afraid so he needs a certain amount of money to feel comfortable in this present culture. So I choose to keep him happy so he doesn't act up and interfere with my work.

ESL letter

It's time for me to get back to work.
I took the past few months off to
finish writing my ESL system,
Gendo: A way of speaking.

My ~~background~~ studies in music,
linguistics and cognitive
psychology have equipped me in
a unique way to assist people to
master speaking + hearing skills

Gendo

Actually, I (doesn't)/(don't)
create any thoughts. I (have/has)
learned to get out of the way and
allow the LM to work. First, of course,
it should be de-bugged and re-programmed
unless

— you were fortunate enough to have been well programmed from the beginning.

It should be is the duty of every parent to be about the business of debugging your own language machine.

You can tell your children everything they should and shouldn't do. But, children learn what you really do. they watch your behavior. If you tell them to be open minded, but you are stuck in enormous systems of unconscious, unquestioned assumptions, what do you think they'll learn.

You should be telling to yourself and your children. you should spend 10% of the free time engaged in improving your thinking skills. →

Thinking/shuffling

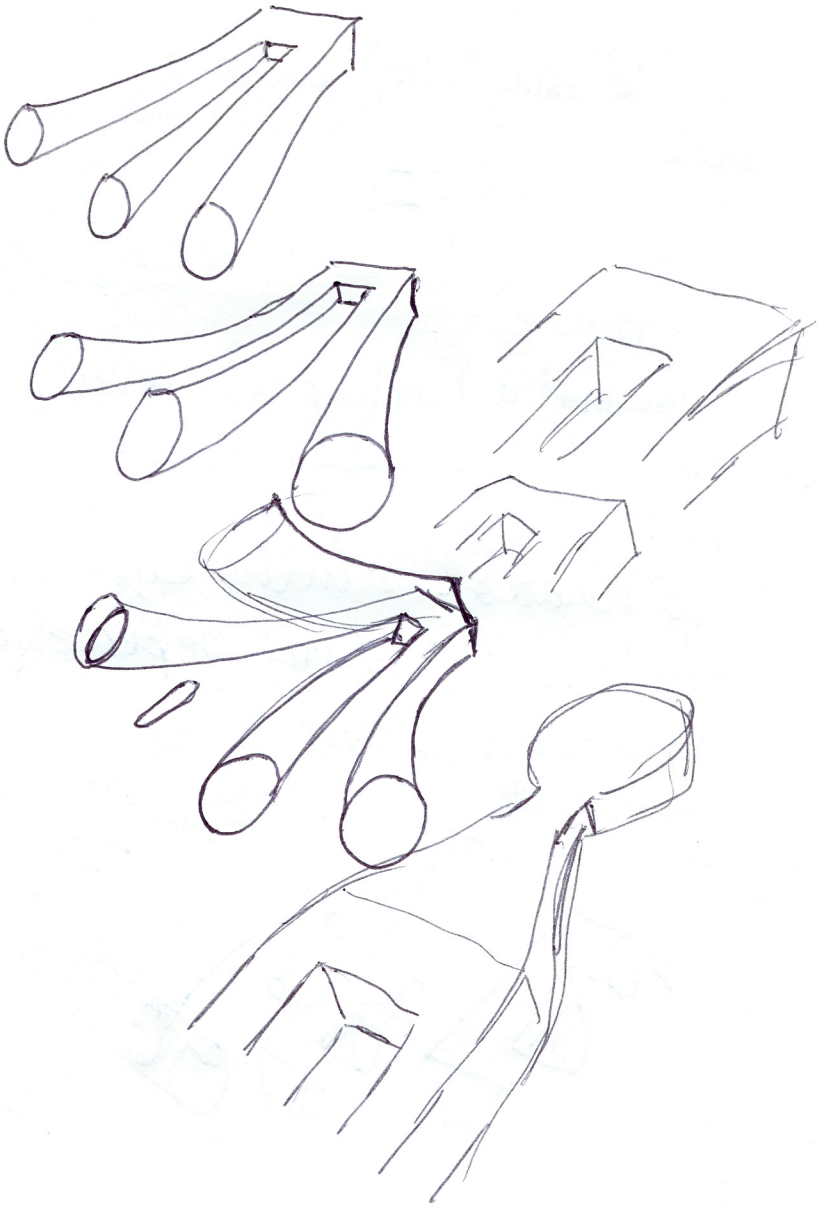

A problem with selling this concept is that the shufflers usually are offended by the suggestion that they don't think.

I'm not saying you can't think.

It's sometimes difficult to remain in the Kronan state when your monkey's hormone are stimulated by the presence of an attractive female sape.

It's often useful to meet/and study with people who don't activate your monkey.

When every male sapes gather in the prensense of even one female sape — much of the males behavior is a posturing for the females attention
